

Hahn Air Lines

Transportation of Animals

With Hahn Air Lines, your dog or cat will fly with you in the cabin during the entire flight.

To ensure your pets are safely transported, and for the consideration of other passengers, your pets are welcome on our business jets under the following conditions:

- Your animal is transported in a soft carrier bag (max dimensions 50 x 40 x 20 cm) that is clean, escape-proof and scratch-resistant or in a transport box (size "S", max dimensions 57 x 37 x 36 cm).
- Dogs and cats should weigh no more than 7 kg (carrier bag inclusive).
- The animal remains inside their spacious carrier bag or box for the duration of the flight. The transport container must be large enough for the animal to stand up, turn around and lie down in a natural position. It is prohibited for the animal to roam free in the aircraft cabin.
- Your pet must be clean, healthy and should not bother other passengers. It is neither dangerous nor pregnant and is odor free.

Compliance with the entry and exit requirements as well as the animal welfare regulations is your responsibility. Please consult regulations of your destination countries with the respective consulate and speak with your veterinarian.

Please note that only a limited number of animals are allowed on board per flight. Therefore, we recommend an early reservation to ensure your pet can be transported. If your pet does not behave in accordance with these guidelines, Hahn Air Lines reserves the right to refuse transport of the animal.

Should you wish to transport animals other than a dog or a cat, kindly send an enquiry by email to charter@hahnair.aero.
